How to Replace a Hearing Aid Battery

Step 1: Open the battery door.

Step 2: Remove the battery. A tool with a magnet is useful.
**Step 3:** Take a new battery out of your battery pack.

**Step 4:** Remove the paper tab from the battery. After removing the tab, let the battery absorb the air for 30 seconds to ensure maximum battery life.
**Step 5:** Place the new battery in the battery door with the positive (+) side of the battery facing up.

**Step 6:** Close the battery door and you are finished.
