Residents = 60
Resident performance

- Each resident met or exceeded all program requirements
- 47 of 50 graduates (94%) placed in a target position within 12 months of completion
MD attendings’ perceptions of DC residents

Clinical competence

“The chiropractic resident was excellent; he was on par with a mid-level neurosurgery fellow”
• Chief, Neurosurgery

Integration

“I had her teach the low back exam to my med students”
• Primary Care Physician

Value

“I wish we could hire him right now”
• Chief, Physiatry
Residency alumni perceptions

Clint Daniels, DC
St. Louis, 2015

“The residency program has opened innumerable doors… pathways to pursue a chiropractic career in a hospital system, opportunities for leadership positions and academic projects, and a robust network of colleagues committed to my success.”

Chiropractic Section Chief
VA Puget Sound Healthcare System

Brian Giuliani, DC
Connecticut, 2016

“I work for a large hospital system and fully credit the VA chiropractic residency program for my professional success. Learning under experienced chiropractors enabled me to better manage the complex musculoskeletal cases that I see daily. The interprofessional clinical rotations made it easy to integrate into my current role in our spine clinic.”

Staff Chiropractor
Aurora Health Care

Enya Katz, DC
Los Angeles, 2019

“The residency put me in the position to excel at this VA job that I am so blessed and grateful to have. The program presented uncountable opportunities that I otherwise would never dream of having, such as scrubbing in to surgeries, and learning from the smart, thoughtful, and talented attendings and residents who were generous enough to teach and mentor me.”

Staff Chiropractor
VA Greater Los Angeles Healthcare System
Supplemental Information for Applicants

- Application period opens the first Monday of January each year
  - Full information is available on the VA Chiropractic Program [website](#)
- VA Chiropractic Residency Programs follow a standardized application and Match process to fill available slots
  - Candidates are matched to residency programs following an unbiased, algorithmic match process where candidates and facilities rank order their preferences and the candidate’s preference receives priority
- Features of strong applicants
  - High GPA and hospital training as a DC student
  - Commitment to integrated, collaborative practice
  - Knowledge of current evidence related to chiropractic care
  - Strong recommendation letters from individuals with experience formally supervising/assessing the applicant
  - Professional, collegial, and self-driven attributes
